Data Science Master Program

ABOUT THE STUDENT

Candidate Profile

Roll Number

2410031602

Institute

IILM University, Greater Noida, U.P.

Programme

Data Science Master, AICTE–EduSkills Virtual Internship

Internship Domain

Data Science (Supported by Siemens)

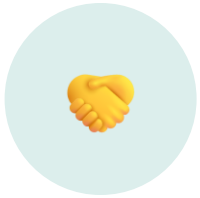

Duration

8 Weeks | April – June 2026

ABOUT THE PROGRAM

EduSkills, AICTE & Siemens

EduSkills Foundation is a non-profit organisation building an Industry 4.0-ready digital workforce in India. It partners with the All India Council for Technical Education (AICTE) to run the AICTE–EduSkills Virtual Internship Program under the AICTE National Internship Portal. For the Data Science Master track, EduSkills collaborates with Siemens, whose Altair/RapidMiner Academy delivers an industry-aligned, no-code-to-code data science curriculum through structured learning modules and a capstone project.

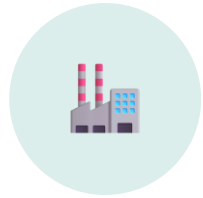

Nation Building

EduSkills works under the theme “Nation Building Through Skills” for India's students.

AICTE Patronage

Run under the AICTE National Internship Portal, jointly certified with the Ministry of Education.

Siemens Support

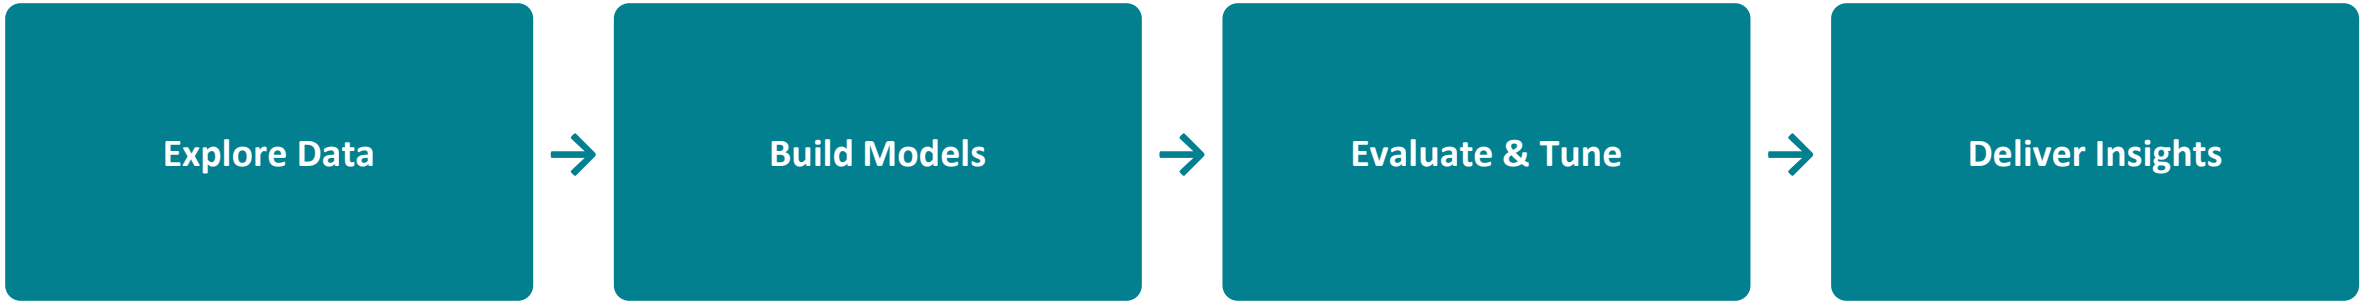

Industry curriculum delivered via Siemens' Altair/RapidMiner Academy learning pathways.

PROBLEM STATEMENT

Bridging Theory and Applied Data Science

Although many students learn statistics and machine learning theory in coursework, very few get structured, hands-on exposure to the full data science lifecycle — from cleaning messy real-world data to building, evaluating and communicating predictive models. Concepts such as regression, classification and model tuning are often understood only theoretically, with little practice applying them to real datasets using industry tools.

This internship addressed that gap — practically learning the full data science workflow:

PROJECT OBJECTIVES

What the Internship Set Out to Achieve

Data Wrangling

Clean, transform and prepare messy real-world datasets for analysis.

Exploratory Analysis

Uncover patterns and relationships through statistics and visualization.

Predictive Modeling

Build regression & classification models using Python and RapidMiner.

Model Evaluation

Validate, tune and compare models using standard performance metrics.

Insight Storytelling

Communicate findings clearly through charts, dashboards and reports.

Capstone Project

Deliver an end-to-end data science case study from raw data to insight.

TECHNOLOGIES & TOOLS

The Toolkit Behind the Internship

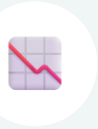

Python

Core programming language

Pandas & NumPy

Data wrangling & analysis

Matplotlib / Seaborn

Data visualization

RapidMiner Studio

No-code ML workflows

Statistics

Hypothesis testing & inference

Scikit-learn

Regression & classification

Model Tuning

Evaluation & optimization

Capstone Project

End-to-end case study

DATA SCIENCE PIPELINE

From Raw Data to Actionable Insight

Data Collection Layer	Raw structured & unstructured datasets gathered
Cleaning & Preprocessing	Missing values, outliers and formatting handled
Exploratory Analysis Layer	Statistical summaries & visual pattern discovery
Model Building Layer	Regression & classification models trained
Evaluation & Tuning Layer	Metrics compared; hyperparameters optimized
Insight & Reporting Layer	Findings visualized and delivered as a capstone

METHODOLOGY

The 8-Week Learning Journey

1 WEEK

Foundations & Statistics

Core statistics and data science principles

2 WEEK

Data Wrangling

Cleaning & transforming data with Python

3 WEEK

Exploratory Data Analysis

Visual & statistical pattern discovery

4 WEEK

No-Code ML with RapidMiner

Building workflows on RapidMiner Studio

5 WEEK

Regression Models

Predicting continuous outcomes

6 WEEK

Classification Models

Predicting categorical outcomes

7 WEEK

Evaluation & Tuning

Metrics, cross-validation & optimization

8 WEEK

Capstone Project

End-to-end data science case study

EXPECTED OUTCOMES

Skills & Capabilities Gained

- ✓ Ability to clean, wrangle and explore real-world datasets using Python (Pandas & NumPy)
- ✓ Practical understanding of building machine learning models with RapidMiner and Python
- ✓ Hands-on exposure to regression, classification and model evaluation techniques
- ✓ Capability to visualize data and communicate insights clearly through charts and reports
- ✓ Skill to build an end-to-end data science pipeline, from raw data to actionable insight
- ✓ Completed all learning-pathway modules & the capstone project; cleared the Final Credential Validation with an “Outstanding” grade

CERTIFICATION

Successfully Completed

Grade

O – Outstanding

Certificate ID

4b5f9d8bd61aa770e5fb

Roll Number

2410031602

Duration

8 Weeks | April – June 2026
